

# KLT2 PIX@PEAKS SITE / KLT INDEX / TEXTWORK SDK RU/EN v148-v150

Курпишев Иван Борисович / Ivan Borisovich Kurpishev · Independent Researcher, Kaliningrad

## Статус

site\_klt\_index\_type\_table\_textwork\_sdk\_without\_truth\_status

v148 reorganizes klt/index.html into type-based columns and removes missing local targets. v149 extends the bottom index.html monograph block with volume numbers and a KLT-RBD5.10 APK/Flutter SDK TextWork block. v150 prepares a deployable site delta under 250 MB.

## Главная формула

klt typed table + root monograph volumes + KLT-RBD5.10 TextWork APK/Flutter SDK block != truth-status

## Правила сборки

| Rule  | Status                          |
|---|---------------------------------|
| No standalone CSV/JSON/HTML links in answer | applied                         |
| ZIP under 250 MB                            | applied                         |
| No-loss site rule                           | add-only; old content preserved |
| Empty/missing local links in klt/index.html | fallback to root v32-v140.pdf   |
| truth-status promotion                      | 0                               |

## Тома новой многотомной монографии

| Volume | Title  |
|--------|--|
| 0      | External Reader Map and Method Constitution                  |
| I      | Foundations of Kurpishev Logic                               |
| II     | Projective and Packet Geometry                               |
| III    | NAPG, Stratified Time and Associator Geometry                |
| IV     | Evidence-D, RBD and Predictive Method                        |
| V      | KLT-RBD CHEM   |
| VI     | KLT-RBD PHYS   |
| VII    | KLT-RBD5.10 Software and Databases                           |
| VIII   | Epistemology, Anthropology and Philosophy of Natural Science |
| IX     | Biology, DNA and Bio-Chem Reper Bridges                      |
| X      | Site, Program Packages, APK/SDK and Publication Archive      |

## Финальная фиксация

v148/v150 = site table repair + monograph volume block + KLT-RBD5.10 APK/Flutter SDK TextWork program block. truth\_status\_promoted\_count = 0; publication\_verified\_status\_count = 0; global\_Fano\_carriers = 0.
