

KLT2 PIX@PEAKS Volume II, NAPG Ledger and Dashboard v160-v162

Курпишев Иван Борисович / Ivan Borisovich Kurpishev · Independent Researcher, Kaliningrad

Статус

volume2_napg_notation_ledger_dashboard_without_truth_status

Volume II chapters 1-3 + NAPG notation ledger integration + KLT-RBD5.10 theorem-candidate dashboard != truth-status.

Нижнее основание

C@C -> Rep(R,I,U;D) -> lambda-truth -> D/Dom -> proof-ledger -> RBD/RPD -> KLT

Компонент D сохраняется как достаточное основание. Без D и Dom утверждение переводится в gap, theorem-candidate или review seed, но не получает publication_verified_status.

v160. Volume II chapters 1-3

Chapter	Title	Rule
1	Cross-ratio as classical invariant and KLT-Reper carrier	classical prior art != KLT theorem
2	Harmonicity and authorization barrier	lambda=-1 without D/Dom != verified status
3	Packet incidence	Inc_pkg(A,L_s;Dom,D) requires Dom and D

Theorem V160-001. Harmonicity is an authorization candidate only. If D/Dom or proof-object is absent, KLT-RBD creates a blocker or theorem-candidate, not verified status.

v161. NAPG notation ledger integration

Symbol	Reserved for	Blocked use
\Hodge	Hodge star	associator/general product
\star	associator printed star R\star R	Hodge star
\delta	E-layer cochain differential	ordinary d in E-layer
\delta_Hdg	Hodge codifferential	cochain differential

Rule V161-001. Reusing the same star for Hodge, associator and ordinary multiplication creates notation_blocker. The parser must not allow proof-status until the notation collision is resolved.

v162. KLT-RBD5.10 proof-ledger dashboard

TheoremCandidateBrowser = (Claim, Source, D, Dom, ProofObject, DependencyGraph, MorphismGate, FanoGate, EvidenceGate, Blockers, Status)

Filter	Meaning	Promotion
definition_core	stable definition nucleus	no
theorem_candidate	candidate awaiting proof ledger	no
formal_theorem_under_axioms	proved under declared axioms	within axioms only
blocked_by_D_Dom	D or Dom missing	no
blocked_by_Fano_morphism	local Fano-like pattern without morphism	no

Финальная фиксация: truth_status_promoted_count = 0; publication_verified_status_count = 0; global_Fano_carriers = 0.
