## 1. Domain fixed / Домен зафиксирован

Canonical publication domain: kurpishev.com

Canonical base URL: https://kurpishev.com/

This domain is fixed for publication of the full monograph and for deployment of ready-to-work KLT-RBD5.1 programs. The public-verification gate remains closed until remote reachability and SHA256 are checked.

## 2. Source check

Source	Declared SHA256	Actual SHA256	Result
v9.0 remote evidence insertion package	91e99f0465cb61fce86bd1a277059e4b81a75c543e93e04b8ba85619aee4e2b5	91e99f0465cb61fce86bd1a277059e4b81a75c543e93e04b8ba85619aee4e2b5	PASS

G-07	VERIFIED_PUBLIC allowed	NO	domain fixed but remote verification pending

## 7. Gate decision

The domain gap is repaired. VERIFIED\_PUBLIC is still blocked until files are uploaded, public URLs are reachable, and remote SHA256 values are recomputed from public downloads.
