KLT-DOCTRINE-FINAL-MONOGRAPH-REMOTE-EVIDENCE-INSERTION-RU-EN-v9.0

1. Status / Статус

The v9.0 package prepares remote evidence insertion after v8.9. Actual public URLs and remote SHA256 values were not supplied, therefore no external-publication claim is made.

Пакет v9.0 готовит вставку удалённых доказательств после v8.9. Реальные URL и remote SHA256 не предоставлены, поэтому внешний публикационный статус не присваивается.

Current status: REMOTE_EVIDENCE_AWAITING_OPERATOR_INPUT_NOT_VERIFIED_PUBLIC.

2. Source check

Source	Declared SHA256	Actual SHA256	Result
v8.9 publication execution log package	f632db5ae17002fe1adf8d4d58a8698fe358a2448f3dfbb10c22d72b425a6a23	f632db5ae17002fe1adf8d4d58a8698fe358a2448f3dfbb10c22d72b425a6a23	PASS

3. Evidence insertion matrix

insert_id	source	operation	status	evidence
INS-01	v8.9 package	load and SHA-check source execution log	PASS	f632db5ae17002fe1adf8d4d58a8698fe358a2448f3dfbb10c22d72b425a6a23
INS-02	v8.9 URL evidence register	count supplied remote URLs	PASS_EMPTY_REGISTER	0
INS-03	v8.9 URL evidence register	count supplied remote SHA256 values	PASS_EMPTY_REGISTER	0
INS-04	site route	insert actual site URL and remote checksum	BLOCKED_NO_REMOTE_EVIDENCE	operator input required
INS-05	DOI route	insert DOI record URL only if created	NO_DOI_CLAIMED	no DOI URL supplied
INS-06	arXiv route	insert arXiv ID only if created	NO_ARXIV_ID_CLAIMED	no arXiv URL supplied

4. URL evidence register

evidence_id	channel	item	remote_url	remote_sha256	v9_0_status
URL-01	site	RU landing page			EMPTY_PENDING_OPERATOR_INPUT
URL-02	site	EN landing page			EMPTY_PENDING_OPERATOR_INPUT
URL-03	site	download ZIP			EMPTY_PENDING_OPERATOR_INPUT
URL-04	DOI	repository record			EMPTY_PENDING_OPERATOR_INPUT
URL-05	arXiv	submission record			EMPTY_PENDING_OPERATOR_INPUT

5. Verified public gate

gate_id	gate	status	required
G-01	v8.9 package SHA passes	PASS	yes
G-02	public site URLs inserted	FAIL_MISSING_REMOTE_URLS	yes
G-03	remote SHA values inserted	FAIL_MISSING_REMOTE_SHA	yes
G-04	remote downloads recomputed locally	BLOCKED_NO_REMOTE_DOWNLOADS	yes
G-05	public/private split rechecked against final URLs	BLOCKED_NO_REMOTE_URLS	yes
G-06	VERIFIED_PUBLIC allowed	NO	final

6. Evidence gaps

gap_id	gap	impact	repair
GAP-REMOTE-URL	No public remote URL supplied	VERIFIED_PUBLIC blocked	insert actual URL after upload
GAP-REMOTE-SHA	No remote SHA256 supplied	download integrity not proven	download remote file and compute SHA256
GAP-REMOTE-DOMAIN	No remote domain evidence for public route	publication claim stays control-status	open public route and record accessible URL

7. Operator remote evidence form

field	value	required	comment
public_ru_url		yes	URL of RU landing page after upload
public_en_url		yes	URL of EN landing page after upload
public_download_zip_url		yes	URL of public ZIP after upload
public_download_zip_sha256		yes	SHA256 after downloading from public URL
doi_record_url		conditional	only if DOI deposit is actually created
arxiv_record_url		conditional	only if arXiv draft/submission exists
operator_name_or_initials		yes	manual evidence holder
operator_date_utc		yes	date of remote evidence insertion

8. Gate decision

The package is accepted as a remote-evidence insertion shell and blocker report. It is not accepted as evidence of external publication until URLs and remote SHA256 checks are inserted and verified.
